

**CORONAVIRUS (COVID-19)**

**Michigan Urgent Care is here to help your patients with testing and treatment for COVID-19:**

**– Available now In-House Pharmacy Services that can dispense Z-pack and Hydroxy-chloroquine.**

**Currently we perform two tests, both require a full urgent care visit registration :**

- 1. Nasal swab for PCR which detects active, carrier state or incubation period for COVID-19 infection.**
- 2. A blood draw which is sent to lab to test for IgG, which if positive will confirm a past infection and potentially immunity to COVID 19 virus.**
